

Design Engineer Thermal Management Automotive (m/f/d)

LOCATION
Petaling Jaya

COMPANY
ARRK Malaysia Sdn Bhd

CONTRACT TYPE
Full-time

Form of Work
Office

WHAT TO EXPECT

Join a team at the forefront of automotive thermal management innovation. You will play an active role throughout the entire development process, from initial concept creation to successful series production. Working closely with global teams, you will solve challenging engineering problems while expanding your technical expertise and advancing your career in a collaborative environment.

YOUR TASKS

- Development of components and assemblies for engine cooling, air conditioning, battery conditioning, and thermal management systems
- 3D modeling, assembly design, and drafting using CATIA V5 and/or Siemens NX
- Product development considering manufacturing processes such as injection molding, die casting, vulcanization, and extrusion
- Optimization of designs with regard to functionality, quality, manufacturability, and costs
- Support of customer projects throughout the entire development process, from concept phase to series production
- Preparation and maintenance of technical documentation according to customer requirements
- Coordination and collaboration with international and cross-functional engineering teams
- Participation in design reviews, technical problem-solving, testing, and validation activities

YOUR PROFILE

- Bachelor's or Master's degree in Mechanical Engineering, Automotive Engineering, or a related field
- Experience with CAD software, particularly CATIA V5; Siemens NX is an advantage
- Good knowledge of Microsoft Office applications
- Strong organizational, communication, and interpersonal skills
- Ability to work independently as well as effectively within a team
- Creative, proactive, and self-motivated approach to engineering challenges
- Proficiency in English; German language skills are considered an advantage

YOUR BENEFITS

Exciting projects

Attractive salary

Creative scope

Pleasant working atmosphere
