

## Product Manager (m/f/d) - Automated Driving

**LOCATION**  
Madrid

**COMPANY**  
ARRK Engineering Spain,  
Sucursal en España

**CONTRACT TYPE**  
Full-time

**Form of Work**  
Hybride

### WHAT TO EXPECT

The field of Automated Driving is evolving rapidly — and with it, the requirements for innovative software products and modern development approaches.

To meet this transformation, we are currently building a new Product Management division for Automated Driving.

In this role, you will take on a key shaping function: from the very beginning, you will help define the structures, processes, and mindset of product management, while working closely with interdisciplinary teams to develop innovative software products for Automated Driving development.

### YOUR TASKS

- Development and further enhancement of innovative software products for Automated Driving
- Identification and evaluation of new technological, methodological, and process-related innovations in AD / ADAS development
- Further development of existing solutions and automations into scalable, market-ready software products
- Definition of product vision, strategy, and roadmap for innovative development and software solutions
- Close collaboration with Software Development, Systems Engineering, Testing, and other departments
- Translation of technical innovations and development needs into clear user stories and requirements
- Support throughout the entire product lifecycle — from idea generation and prototyping to rollout
- Analysis of market, technology, and trend developments in the field of Automated Driving

### YOUR PROFILE

- Degree in Computer Science, Automotive Engineering, Industrial Engineering, or a comparable field of study
- Experience in product management, ideally in the automotive, software, and/or high-tech environment
- Strong understanding of Automated Driving development (e.g. ADAS / AD, software architectures, simulation, validation, toolchains)
- Ability to structure technical complexity and translate it into product strategies
- Experience with agile development models and interdisciplinary collaboration

### YOUR BENEFITS

Exciting projects

Employee events

Attractive salary

Creative scope

Sports and  
wellness offers

Pleasant working  
atmosphere
