

Cyber Security Engineer (m/f/d)

LOCATION
Cluj-Napoca

COMPANY
ARRK Research & Development
SRL

CONTRACT TYPE
Full-time

Form of Work
Hybride

WHAT TO EXPECT

- The Digitalization & Software area- with around 100 employees - shapes the digital transformation of companies from various industries using the latest technologies and methods. We offer space for your own ideas, professional development and professional processes in a start-up atmosphere.
- If you have a passion for cybersecurity, are tech-savvy and have the ability to proactively respond to evolving threats, we look forward to receiving your application.
- As a cybersecurity engineer, you are responsible for ensuring the security of our IT infrastructure and sensitive data.

YOUR TASKS

- Conception and implementation of security architectures.
- Integration of security solutions into existing systems.
- Maintenance and care of security systems (updating, monitoring, fixing gaps).
- Carrying out security tests (penetration tests, vulnerability scans, audits).
- Monitoring networks and systems for security threats.
- Rapid response to security incidents (investigation, action).
- Employee training to raise awareness of security practices.
- Develop training materials and resources.

YOUR PROFILE

- Completed studies in the field of computer science, cybersecurity or a similar field.
- Proven professional experience as a cybersecurity engineer.
- Sound knowledge of network security, encryption technologies and firewalls, pentests (e.g. OWASP Top 10).
- Experience applying security standards and protocols.
- Programming experience in relevant languages (e.g. Python, Java, C++) is an advantage.
- Analytical skills to identify vulnerabilities and develop appropriate countermeasures.
- Cybersecurity certifications (e.g. CISSP, CEH) are desirable.
- Good communication skills (in English, German is a plus) to convey complex security concepts in an understandable manner.
