

## DevOps and ETL Engineer with Azure (m/f/x)

**LOCATION**  
Petaling Jaya

**COMPANY**  
ARRK Malaysia Sdn Bhd

**CONTRACT TYPE**  
Full-time

**Form of Work**  
Hybride

### WHAT TO EXPECT

Are you creative, with a passion to put your ideas and expertise to good use? Then welcome to ARRK Engineering. We offer you excellent career prospects, a challenging range of tasks, independence, as well as a welcoming and respectful working environment. **Come and join our team!**

### YOUR TASKS

- Development and implementation of scalable ETL processes, in particular using Azure Databricks.
- Management and optimization of data pipelines and data integration solutions based on the Azure and AWS.
- Build and maintain CI/CD pipelines and automate development and operations processes using Azure DevOps.
- Collaborate with cross-functional teams to analyze requirements and ensure successful implementation of cloud-based solutions
- Monitoring and optimizing system and application performance in the cloud
- Ensuring best practices in terms of security, scalability and reliability
- Takeover of the responsibility of on-call availability at least one week per month.

### YOUR PROFILE

- Experience with Azure Cloud is a plus (e.g. Databricks and other Azure data services).
- In-depth knowledge of developing and managing ETL processes and data pipelines.
- Hands-on experience with DevOps tools and processes.
- Good knowledge of common programming languages for data processing and pipeline development.
- Experience with container technologies such as Docker and Kubernetes.
- Ability to work in an agile environment and translate complex technical requirements into practical solutions.

### YOUR BENEFITS
