

## Data Engineer Autonomous Driving (m/f/x)

**LOCATION**  
Kuala Lumpur

**COMPANY**  
ARRK Malaysia Sdn Bhd

**CONTRACT TYPE**  
Full-time

**Form of Work**  
Office

### WHAT TO EXPECT

In the area of autonomous driving, you can expect an interdisciplinary and innovative environment. You will implement and advance groundbreaking projects around data-driven software solutions.

We offer the opportunity to actively shape the projects and expand your own knowledge, together with a motivated and mutually supportive team.

### YOUR TASKS

- Develop highly scalable digital products and services for automated consolidation, processing, and analysis of large-scale data sets
- Design and implement efficient data transformations, pipelines, and ETL processes
- Build data pipelines for cutting-edge AI applications
- Evaluate emerging technologies and industry trends, contributing to architectural decisions and fostering innovative solutions
- Collaborate closely with stakeholders and customers throughout development, deployment, and operations to ensure continuous improvement
- Maintenance and support of the developed software
- Creation of documentation and presentations for the software

### YOUR PROFILE

- University degree in Data Engineering, Data Science, Computer Science, Software Engineering, Mathematics, or a comparable field
- Practical experience with cloud platforms such as Azure, AWS, or Palantir (e.g., Databricks, ADX, Glue, Azure Data Factory, Foundry)
- Experience developing SQL/KQL dashboards
- Strong knowledge of data modeling, data engineering, and/or data management
- Experience in data science and/or machine learning
- Excellent Python skills and solid knowledge of Apache Spark
- Additional programming experience is a plus (e.g., JavaScript, C/C++, Java)
- Experience with containerization and orchestration technologies such as Docker, Kubernetes, or ARGO Workflows is an advantage

### YOUR BENEFITS

Exciting projects

Employee events

Creative scope

Pleasant working atmosphere
