

Al & Data Engineer (m/f/x)

ABOUT THE ROLE

We're looking for a skilled and forward-thinking **AI & Data Engineer** to join our international, multi-country team. In this role, you'll design, build, and optimize data pipelines and machine learning infrastructure that power intelligent applications and data-driven decisions. You'll work at the intersection of **Data Engineering**, **Machine Learning**, and **MLOps**, helping us scale AI solutions from experimentation to production.

YOUR TASKS

- Develop and maintain scalable data pipelines and ETL processes.
- Build and deploy machine learning models using modern frameworks and tools.
- Design and implement MLOps workflows for model training, validation, deployment, and monitoring.
- Collaborate with data scientists, software engineers and product teams to deliver Al-powered solutions.
- Ensure data quality, security, and compliance across systems.
- Optimize performance of data and ML systems in cloud environments.
- Stay up-to-date with the latest trends in Al, data engineering, and MLOps.

YOUR PROFILE

- 4+ years of experience in data engineering, machine learning or Al development.
- Strong proficiency in **Python** and relevant libraries (e.g., Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch).
- Experience with MLOps tools (e.g., MLflow, Kubeflow, Airflow, Docker, Kubernetes).
- Solid understanding of data architecture, cloud platforms (AWS, Azure), and CI/CD pipelines.
- Familiarity with SQL, NoSQL, and data engineering tools (e.g., Spark, Hadoop, Talend, Informatica, Snowflake, BigQuery).
- A positive attitude, a collaborative spirit, and excellent communication skills.
