Hybride

WHAT TO EXPECT

- Are you a web developer looking to make a real impact in a start-up style environment within a larger organization? Our 100-person department is driving innovation in the automotive industry, and we need your skills to help us accelerate our digital transformation.

- Be a part of creating and maintaining high-performance web applications for top automotive manufacturers. Champion best practices to ensure the highest standards in software development. Demonstrate your deep understanding of web architecture while working within cross-functional teams on web application projects.

- If you're ready to tackle exciting challenges and grow with us, we want to hear from you!

YOUR TASKS

- Develop and maintain high-performance web applications for leading automotive manufacturers
- Follow and spread best practices for high quality software development
- Collaborate in a cross-functional team to define, design, and ship new
- Deloy and manage applications on AWS cloud infrastructure
- Ensure the performance, quality and responsiveness of applications
- Help maintain code quality, organization, and automation
- Work on concepts and specifications in coordination with customers

YOUR PROFILE

- Proven experience as a Full stack Software Developer or similar role
- Strong proficiency in Angular (alternatively React/Vue.js) for Frontend Development
- Experience using NodeJS or Java Spring Boot for Backend Development
- Familiarity with AWS cloud services and deployment
- Knowledge of quality standards and professional methods in software development: Clean Code, TDD, SOLID Principles, etc.
- Good communication skills (also in English, German is a plus).
- Interest in the automotive industry is an advantage
